## 82-45-702

*Mobile pump sets on wheels:  
Now available with EU Stage V engine*

No matter if it concerns pushing jetting tubes for well pointing into the soil, high pressure cleaning or other contractors' pumping applications: the 80 Series pump has always been a popular choice at construction and industrial sites.

FUEL TANK	TARE WEIGHT	ENCLOSURE
12 liters	261 kg	Steel enclosure, with removable sound-reducing cover

### Cleaner and more economical

The set is now equipped with a water cooled 2-cylinder diesel engine which complies with EU Stage V emission regulations, and is more economical, cleaner and more silent than ever. The heart of this set, the Gorman-Rupp 82H52 pump, has remained and has a proven reliable track record.

Equipped with the new engine, the center of gravity has changed. The 82-45-702 is even easier to move and more maneuverable than before. The pump set is equipped with an enclosure, to further reduce sound levels and to ensure moving parts are adequately protected.

### PUMP

Gorman-Rupp 82H52 self-priming centrifugal pump

### ENGINE

Kohler KDW702 water-cooled 4-stroke 686 cc 2-cylinder diesel engine

### IMPELLER

7.12" cast iron impeller

### PERFORMANCE

Max. 45 m<sup>3</sup>/h flow or 64 mwc head

### DIMENSIONS

2" x 2" BSP-T connection size, 19 mm solids
