AMPCO PM POWDER MIXER

No lumps, reduced processing time, larger batches and fully customizable!

Blend wet and dry ingredients together quickly and precisely with the Ampco PM Powder Mixer. The PM Powder Mixer will save time and money by providing optimal mixing consistency and reduced processing time. The PM Powder Mixer is set in-line so there is no limit to the batch size.

Ampco can customize a powder mixer designed to specific applications further maximizing efficiency and providing a superior end-product.

Ampco welds the hopper to the table for perfect streamlining from table top to hopper and easy cleanup. Table top is ergonomically designed for safe and operator-friendly operation.

STANDARD FEATURES

- Butterfly valves on hopper and inlet
- Sight glass
- NEMA 4X control panel with start/stop buttons, emergency stop and overload protection
- Locking Wheels
- Easy to grip handles at both ends of table

KEY COMPONENTS

- A.** Ampco SP Liquid Ring Pump
- B.** Ampco SBH Shear Blender
- C.** Powder Hopper
- D.** Powder Control Valve
- E.** Fluid Control Valve
- F.** Dual-Motor Starter

HOW IT WORKS

- 1.** The fluid from the batch tank is drawn in from the SP liquid ring pump.
- 2.** Powder and fluid meet in the induction tube when the hopper's valve is opened.
- 3.** Mixing begins in the SP pump - the mixture flows through a short transfer tube into the Shear Blender.
- 4.** The SBH Shear Blender runs at high speed to thoroughly continue to mix the fluid and powder.
- 5.** The final mixture is then pumped to a batch or process tank.

OPTIONS

- Air operated hopper vibrator
- Electric hopper vibrator with control unit
- Hopper screen
- Ball valves
- VFD control unit
